Subject Index

Acrylic acid hydrogenation
Kinetics of hydrogenation of acrylic acid to propionic acid on a copper catalyst (38)53

Adsorption
Hydrogenation of carbon species on iron catalysts studied by Raman-ellipsometry spectroscopy (38)1

Adsorption
Characterization of alumina–montmorillonite complexes (38)119

Adsorption
Influence of water on the gas-phase decomposition of methyl tert.-butyl ether catalysed by a macroporous ion-exchange resin (38)327

Adsorption
Comparison of carbon monoxide and nitrous oxide adsorption on copper/zinc oxide catalysts (38)359

Ageing
Chemical and thermal stability of dealuminated faujasite-type zeolites in gaseous and aqueous phases (38)71

Ageing
Hydrothermal modifications of matrix-embedded Y-faujasite and offretite zeolites (38)225

Alumina–montmorillonite
Characterization of alumina–montmorillonite complexes (38)119

Alumina–montmorillonite
Catalytic cracking of heavy oil: use of alumina–montmorillonites both as catalysts and as matrices for rare earth exchanged zeolite Y molecular sieve (38)131

Amberlyst 15
Influence of water on the gas-phase decomposition of methyl tert.-butyl ether catalysed by macroporous ion-exchange resin (38)327

Ammoxidation
Role of the chemistry of solutions of titanium ions in determining the structure of V/Ti/O catalysts (38)311

Antimony pentafluoride–hydrofluoric acid
Cracking of heptanes in superacid antimony pentafluoride–hydrofluoric acid (38)211

Boudouard reaction
Hydrogenation of carbon species on iron catalysts studied by Raman-ellipsometry spectroscopy (38)1

Butane oxidation
V–P–O catalysts for oxidation of butane to maleic anhydride: influence of $(VO)_2H_4P_2O_9$ precursor morphology on catalytic properties (38)193

Carbon hydrogenation
Hydrogenation of carbon species on iron catalysts studied by Raman-ellipsometry spectroscopy (38)1

Carbon monoxide adsorption
Comparison of carbon monoxide and nitrous oxide adsorption on copper/zinc oxide catalysts (38)359

Carbon monoxide hydrogenation
Design of Fischer–Tropsch catalysts by pulse surface reaction rate analysis. II. Selective production of liquid fuel fraction on ruthenium/alumina catalyst promoted by rare earth oxides (38)61

Carbon monoxide hydrogenation
Cobalt/manganese oxide water gas shift catalysts. I. Competition between carbon monoxide hydrogenation and water gas shift activity (38)103

Carbon monoxide hydrogenation
Design of Fischer–Tropsch catalysts by pulse surface reaction rate analysis. Part III. Optimum amount of vanadium oxide added to ruthenium/alumina catalyst for liquid fuel production (38)301

Catalyst characterization
Stabilization of tin in bimetallic iridium–tin systems supported on alumina and silica: Mössbauer spectroscopy and catalytic acitivity (38)19

Catalyst characterization
High-resolution electron microscopic study of the structure of filamentary carbon on

iron and nickel catalysts (38)41
Catalyst characterization
Chemical and thermal stability of dealuminated faujasite-type zeolites in gaseous and aqueous phases (38)71
Catalyst characterization
Influence of soluble aluminium on the thermal decomposition of praseodymium trinitrate/alumina and the study of the alumina support effect (38)89
Catalyst characterization
Characterization of alumina–montmorillonite complexes (38)119
Catalyst characterization
Catalytic cracking of heavy oil: use of alumina–montomorillonites both as catalysts and as matrices for rare earth exchanged zeolite Y molecular sieve (38)131
Catalyst characterization
V–P–O catalysts for oxidation of butane to maleic anhydride: influence of $(VO)_2H_4P_2O_9$ precursor morphology on catalytic properties (38)193
Catalyst characterization
Hydrothermal modifications of matrix-embedded Y-faujasite and offretite zeolites (38)225
Catalyst characterization
Effect of phosphorus on the surface concentration of molybdenum and nickel in the oxide form of nickel–molybdenum/alumina catalysts and on their hydrodesulphurization activity (38)235
Catalyst characterization
Optimization of the promoter effect in the direct synthesis of oxygenates from syngas (38)241
Catalyst characterization
Fluorinated hydrotreatment catalysts: characterization and hydrodesulphurization activity of fluorine–nickel–molybdenum/γ-alumina catalysts (38)255
Catalyst characterization
Fluorinated hydrotreatment catalysts: characterization and hydrodesulphurization activity of fluorine–cobalt–molybdenum/γ-alumina catalysts (38)273
Catalyst characterization
Effect of high-temperature treatment on the activity of montmorillonite pillared by alumina in the conversion of 1, 2, 4-trimethylbenzene (38)289
Catalyst characterization
Catalytic activity of supported liquid-phase lithium–palladium acetate catalysts in the oxidation of ethylene to vinyl acetate (38)353
Catalyst characterization
Comparison of carbon monoxide and nitrous oxide adsorption on copper/zinc oxide catalysts (38)359
Catalyst preparation
Stabilization of tin in bimetallic iridium–tin systems supported on alumina and silica: Mössbauer spectroscopy and catalytic acitivity (38)19
Catalyst preparation
Characterization of alumina–montmorillonite complexes (38)119
Catalyst preparation
Catalytic cracking of heavy oil over catalysts containing different types of zeolite Y in active and inactive matrices (38)143
Catalyst preparation
V–P–O catalysts for oxidation of butane to maleic anhydride: influence of $(VO)_2H_4P_2O_9$ precursor morphology on catalytic properties (38)193
Catalyst preparation
Cracking of heptanes in superacid antimony pentafluoride–hydrofluoric acid (38)211
Catalyst preparation
Effect of phosphorus on the surface concentration of molybdenum and nickel in the oxide form of nickel–molybdenum/alumina catalysts and on their hydrodesulphurization activity (38)235
Catalyst preparation
Optimization of the promoter effect in the direct synthesis of oxygenates from syngas (38)241
Catalyst preparation
Fluorinated hydrotreatment catalysts: characterization and hydrodesulphuriza-

tion activity of fluorine–nickel–molybdenum/γ-alumina catalysts (38)255
Catalyst preparation
Fluorinated hydrotreatment catalysts: characterization and hydrodesulphurization activity of fluorine–cobalt–molybdenum/γ-alumina catalysts (38)273
Catalyst preparation
Role of the chemistry of solutions of titanium ions in determining the structure of V/Ti/O catalysts (38)311
Catalyst preparation
Catalytic activity of supported liquid-phase lithium–palladium acetate catalysts in the oxidation of ethylene to vinyl acetate (38)353
Catalyst preparation
Reduction of nickel/magnesia catalysts (38)365
Catalytic cracking
Catalytic cracking of heavy oil: use of alumina–montmorillonites both as catalysts and as matrices for rare earth exchanged zeolite Y molecular sieve (38)131
Catalytic cracking
Catalytic cracking of heavy oil over catalysts containing different types of zeolite Y in active and inactive matrices (38)143
Chemical stability
Chemical and thermal stability of dealuminated faujasite-type zeolites in gaseous and aqueous phases (38)71
Cobalt–molybdenum/alumina
Fluorinated hydrotreatment catalysts: characterization and hydrodesulphurization activity of fluorine–cobalt–molybdenum/γ-alumina catalysts (38)273
Cobalt/manganese oxide
Cobalt/manganese oxide water gas shift catalysts. I. Competition between carbon monoxide hydrogenation and water gas shift activity (38)103
Coke formation
High-resolution electron microscopic study of the structure of filamentary carbon on iron and nickel catalysts (38)41
Coke formation
Catalytic cracking of heavy oil: use of alumina–montmorillonites both as catalysts and as matrices for rare earth exchanged zeolite Y molecular sieve (38)131
Coke formation
Catalytic cracking of heavy oil over catalysts containing different types of zeolite Y in active and inactive matrices (38)143
Coke formation
Coking, ageing and regeneration of zeolites. VI. Comparison of the rates of coke oxidation of HY, H-mordenite and HZSM-5 (38)341
Copper/alumina
Kinetics of hydrogenation of acrylic acid to propionic acid on a copper catalyst (38)53
Copper/zinc oxide
Comparison of carbon monoxide and nitrous oxide adsorption on copper/zinc oxide catalysts (38)359

Dealuminated Y zeolites
Chemical and thermal stability of dealuminated faujasite-type zeolites in gaseous and aqueous phases (38)71
Differential thermal analysis
Reduction of nickel/magnesia catalysts (38)365
Disproportionation
Effect of high-temperature treatment on the activity of montmorillonite pillared by alumina in the conversion of 1, 2, 4-trimethylbenzene (38)289

Electronic effect
Electronic effect of the second hetero atom on the hydrodesulphurization of heterocyclic sulphur compounds (38)109
Ethene oxidation
Catalytic activity of supported liquid-phase lithium–palladium acetate catalysts in the oxidation of ethylene to vinyl acetate (38)353

Faujasite
Chemical and thermal stability of dealuminated faujasite-type zeolites in gaseous and aqueous phases (38)71
Faujasite

Hydrothermal modifications of matrix-embedded Y-faujasite and offretite zeolites (38)225

Filamentary carbon
High-resolution electron microscopic study of the structure of filamentary carbon on iron and nickel catalysts (38)41

Fischer-Tropsch reaction
Design of Fischer-Tropsch catalysts by pulse surface reaction rate analysis. Part III. Optimum amount of vanadium oxide added to ruthenium/alumina catalyst for liquid fuel production (38)301

Fischer-Tropsch synthesis
Design of Fischer-Tropsch catalysts by pulse surface reaction rate analysis. II. Selective production of liquid fuel fraction on ruthenium/alumina catalyst promoted by rare earth oxides (38)61

Fluorine-cobalt-molybdenum/alumina
Fluorinated hydrotreatment catalysts: characterization and hydrodesulphurization activity of fluorine-cobalt-molybdenum/γ-alumina catalysts (38)273

Fluorine-nickel-molybdenum/alumina
Fluorinated hydrotreatment catalysts: characterization and hydrodesulphurization activity of fluorine-nickel-molybdenum/γ-alumina catalysts (38)255

Heptane cracking
Cracking of heptanes in superacid antimony pentafluoride-hydrofluoric acid (38)211

Hydrodesulphurization
Electronic effect of the second hetero atom on the hydrodesulphurization of heterocyclic sulphur compounds (38)109

Hydrodesulphurization
Effect of phosphorus on the surface concentration of molybdenum and nickel in the oxide form of nickel-molybdenum/alumina catalysts and on their hydrodesulphurization activity (38)235

Hydrodesulphurization
Fluorinated hydrotreatment catalysts: characterization and hydrodesulphurization activity of fluorine-nickel-molybdenum/γ-alumina catalysts (38)255

Hydrodesulphurization
Fluorinated hydrotreatment catalysts: characterization and hydrodesulphurization activity of fluorine-cobalt-molybdenum/γ-alumina catalysts (38)273

Hydrofluoric acid
Cracking of heptanes in superacid antimony pentafluoride-hydrofluoric acid (38)211

Hydrogenation
Hydrogenation of carbon species on iron catalysts studied by Raman-ellipsometry spectroscopy (38)1

Hydrogenation
Kinetics of hydrogenation of acrylic acid to propionic acid on a copper catalyst (38)53

Hydrogenation
Design of Fischer-Tropsch catalysts by pulse surface reaction rate analysis. II. Selective production of liquid fuel fraction on ruthenium/alumina catalyst promoted by rare earth oxides (38)61

Hydrogenation
Cobalt/manganese oxide water gas shift catalysts. I. Competition between carbon monoxide hydrogenation and water gas shift activity (38)103

Hydrogenation
Design of Fischer-Tropsch catalysts by pulse surface reaction rate analysis. Part III. Optimum amount of Vanadium oxide added to ruthenium/alumina catalyst for liquid fuel production (38)301

HZSM-5
Coking, ageing and regeneration of zeolites. VI. Comparison of the rates of coke oxidation of HY, H-mordenite and HZSM-5 (38)341

Iridium-tin/alumina
Stabilization of tin in bimetallic iridium-tin systems supported on alumina and silica: Mössbauer spectroscopy and catalytic acitivity (38)19

Iron
Hydrogenation of carbon species on iron

catalysts studied by Raman-ellipsometry spectroscopy (38)1

Iron
High-resolution electron microscopic study of the structure of filamentary carbon on iron and nickel catalysts (38)41

Kinetics
Hydrogenation of carbon species on iron catalysts studied by Raman-ellipsometry spectroscopy (38)1

Kinetics
Kinetics of hydrogenation of acrylic acid to propionic acid on a copper catalyst (38)53

Kinetics
Cracking of heptanes in superacid antimony pentafluoride–hydrofluoric acid (38)211

Kinetics
Influence of water on the gas-phase decomposition of methyl tert.-butyl ether catalysed by a macroporous ion-exchange resin (38)327

Lithium–palladium acetate
Catalytic activity of supported liquid-phase lithium–palladium acetate catalysts in the oxidation of ethylene to vinyl acetate (38)353

Lithium/magnesium oxide
Direct partial oxidation of methane: effect of the oxidant on the reaction (38)157

Magnesium oxide
Direct partial oxidation of methane: effect of the oxidant on the reaction (38)157

Maleic anhydride synthesis
V–P–O catalysts for oxidation of butane to maleic anhydride: influence of $(VO)_2H_4P_2O_9$ precursor morphology on catalytic properties (38)193

Methane oxidation
Direct partial oxidation of methane: effect of the oxidant on the reaction (38)157

Molybdenum(VI) sulphide
Electronic effect of the second hetero atom on the hydrodesulphurization of heterocyclic sulphur compounds (38)109

Montmorillonite
Characterization of alumina–montmorillonite complexes (38)119

Montmorillonite
Catalytic cracking of heavy oil: use of alumina–montmorillonites both as catalysts and as matrices for rare earth exchanged zeolite Y molecular sieve (38)131

Montmorillonite
Effect of high-temperature treatment on the activity of montmorillonite pillared by alumina in the conversion of 1, 2, 4-trimethylbenzene (38)289

Mordenite
Coking, ageing and regeneration of zeolites. VI. Comparison of the rates of coke oxidation of HY, H-mordenite and HZSM-5 (38)341

Mössbauer spectroscopy
Stabilization of tin in bimetallic iridium–tin systems supported on alumina and silica: Mössbauer spectroscopy and catalytic acitivity (38)19

Multicomponent gas mixtures
Generation of multicomponent gas mixtures in catalytic flow-type units: a novel high-pressure saturator (38)167

Nickel
High-resolution electron microscopic study of the structure of filamentary carbon on iron and nickel catalysts (38)41

Nickel–molybdenum/alumina
Effect of phosphorus on the surface concentration of molybdenum and nickel in the oxide form of nickel–molybdenum/alumina catalysts and on their hydrodesulphurization activity (38)235

Nickel–molybdenum/alumina
Fluorinated hydrotreatment catalysts: characterization and hydrodesulphurization activity of fluorine–nickel–molybdenum/γ-alumina catalysts (38)255

Nickel/alumina
High-resolution electron microscopic study of the structure of filamentary carbon on iron and nickel catalysts (38)41

Nickel/magnesia
Reduction of nickel/magnesia catalysts (38)365

Nitrous oxide
Direct partial oxidation of methane: effect of the oxidant on the reaction (38)157
Nitrous oxide adsorption
Comparison of carbon monoxide and nitrous oxide adsorption on copper/zinc oxide catalysts (38)359

Offretite
Hydrothermal modifications of matrix-embedded Y-faujasite and offretite zeolites (38)225
Oxygen
Direct partial oxidation of methane: effect of the oxidant on the reaction (38)157
Ozone
Direct partial oxidation of methane: effect of the oxidant on the reaction (38)157

Pillared clay
Effect of high-temperature treatment on the activity of montmorillonite pillared by alumina in the conversion of 1, 2, 4-trimethylbenzene (38)289
Pore structure
Characterization of alumina–montmorillonite complexes (38)119
Praseodymium trinitrate/alumina
Influence of soluble aluminium on the thermal decomposition of praseodymium trinitrate/alumina and the study of the alumina support effect (38)89
Precipitation
Role of the chemistry of solutions of titanium ions in determining the structure of V/Ti/O catalysts (38)311
Pulse surface reaction rale analysis
Design of Fischer–Tropsch catalysts by pulse surface reaction rate analysis. II. Selective production of liquid fuel fraction on ruthenium/alumina catalyst promoted by rare earth oxides (38)61
Pulse surface reaction rate analysis
Design of Fischer–Tropsch catalysts by pulse surface reaction rate analysis. Part III. Optimum amount of vanadium oxide added to ruthenium/alumina catalyst for liquid fuel production (38)301

Raman-ellipsometry spectroscopy
Hydrogenation of carbon species on iron catalysts studied by Raman-ellipsometry spectroscopy (38)1
Rare earth oxides
Design of Fischer–Tropsch catalysts by pulse surface reaction rate analysis. II. Selective production of liquid fuel fraction on ruthenium/alumina catalyst promoted by rare earth oxides (38)61
Regeneration
Coking, ageing and regeneration of zeolites. VI. Comparison of the rates of coke oxidation of HY, H-mordenite and HZSM-5 (38)341
Rhodium/silica
Optimization of the promoter effect in the direct synthesis of oxygenates from syngas (38)241
Ruthenium/alumina
Design of Fischer–Tropsch catalysts by pulse surface reaction rate analysis. II. Selective production of liquid fuel fraction on ruthenium/alumina catalyst promoted by rare earth oxides (38)61
Ruthenium/alumina
Design of Fischer–Tropsch catalysts by pulse surface reaction rate analysis. Part III. Optimum amount of vanadium oxide added to ruthenium/alumina catalyst for liquid fuel production (38)301

Selectivity
Design of Fischer–Tropsch catalysts by pulse surface reaction rate analysis. II. Selective production of liquid fuel fraction on ruthenium/alumina catalyst promoted by rare earth oxides (38)61
Selectivity
Cobalt/manganese oxide water gas shift catalysts. I. Competition between carbon monoxide hydrogenation and water gas shift activity (38)103
Selectivity
Electronic effect of the second hetero atom on the hydrodesulphurization of heterocyclic sulphur compounds (38)109
Selectivity
Catalytic cracking of heavy oil: use of alumina–montmorillonites both as catalysts and as matrices for rare earth exchanged zeolite Y molecular sieve (38)131

Selectivity
Catalytic cracking of heavy oil over catalysts containing different types of zeolite Y in active and inactive matrices (38)143
Selectivity
Direct partial oxidation of methane: effect of the oxidant on the reaction (38)157
Selectivity
V-P-O catalysts for oxidation of butane to maleic anhydride: influence of $(VO)_2H_4P_2O_9$ precursor morphology on catalytic properties (38)193
Selectivity
Cracking of heptanes in superacid antimony pentafluoride-hydrofluoric acid (38)211
Selectivity
Optimization of the promoter effect in the direct synthesis of oxygenates from syngas (38)241
Selectivity
Effect of high-temperature treatment on the activity of montmorillonite pillared by alumina in the conversion of 1, 2, 4-trimethylbenzene (38)289
Selectivity
Design of Fischer-Tropsch catalysts by pulse surface reaction rate analysis. Part III. Optimum amount of vanadium oxide added to ruthenium/alumina catalyst for liquid fuel production (38)301
Silver/alumina
Direct partial oxidation of methane: effect of the oxidant on the reaction (38)157
Soluble aluminium
Influence of soluble aluminium on the thermal decomposition of praseodymium trinitrate/alumina and the study of the alumina support effect (38)89
Stability
Chemical and thermal stability of dealuminated faujasite-type zeolites in gaseous and aqueous phases (38)71
Stabilization
Stabilization of tin in bimetallic iridium-tin systems supported on alumina and silica: Mössbauer spectroscopy and catalytic acitivity (38)19
Steam deactivation
Hydrothermal modifications of matrix-embedded Y-faujasite and offretite zeolites (38)225
Support effect
Influence of soluble aluminium on the thermal decomposition of praseodymium trinitrate/alumina and the study of the alumina support effect (38)89
Syngas conversion
Optimization of the promoter effect in the direct synthesis of oxygenates from syngas (38)241

Temperature-programmed reduction
Reduction of nickel/magnesia catalysts (38)365
Thermal stability
Chemical and thermal stability of dealuminated faujasite-type zeolites in gaseous and aqueous phases (38)71
Thermodynamics
Generation of multicomponent gas mixtures in catalytic flow-type units: a novel high-pressure saturator (38)167

Vanadium oxide/titania
Role of the chemistry of solutions of titanium ions in determining the structure of V/Ti/O catalysts (38)311
Vanadium-phosphorus mixed oxides
V-P-O catalysts for oxidation of butane to maleic anhydride influence of $(VO)_2H_4P_2O_9$ precursor morphology on catalytic properties (38)193
Vinyl acetate synthesis
Catalytic activity of supported liquid-phase lithium-palladium acetate catalysts in the oxidation of ethylene to vinyl acetate (38)353

Water-gas shift reaction
Cobalt/manganese oxide water gas shift catalysts. I. Competition between carbon monoxide hydrogenation and water gas shift activity (38)103

Zeolite Y
Catalytic cracking of heavy oil: use of alumina-montmorillonites both as catalysts and as matrices for rare earth exchanged zeolite Y molecular sieve (38)131
Zeolite Y

Catalytic cracking of heavy oil over catalysts containing different types of zeolite Y in active and inactive matrices (38)143

Zeolites

Chemical and thermal stability of dealuminated faujasite-type zeolites in gaseous and aqueous phases (38)71

Zeolites

Hydrothermal modifications of matrix-embedded Y-faujasite and offretite zeolites (38)225

Zeolites

Coking, ageing and regeneration of zeolites. VI. Comparison of the rates of coke oxidation of HY, H-mordenite and HZSM-5 (38)341
